Re: LEED Contributions  
Project, Job Location

Product: Specified Product and Size

To Whom It May Concern:

Product brick and shapes from Glen-Gery's Plant in Plant Location can help in obtaining LEED certification of a registered building by adding to the sums of the following LEED NC-V3 credits:

Materials and Resources Credit 4 Recycled Content (1 Point -10%, 2 Points -20%): Product brick and shapes contain preconsumer amt% preconsumer recycled content in the form of type of preconsumer content. Product brick and shapes do not contain any post consumer recycled material.  
Materials and Resources Credit 5 Regional Materials (1 Point-10%, 2 Points-20%): 100% of the raw materials are extracted within 500 miles of Job Location. The raw materials are processed and made into brick at the Plant Name, which is approximately miles miles from Job Location.

Additionally,

The Brick Industry Association, of which Glen-Gery Corporation is a member, has promulgated an environmental policy.  
Glen-Gery Corporation has a published environmental policy.  
Quarries are reclaimed and revegetated.  
Virtually all process wastes, except fired, but unusable product, are recycled back into the process.  
Waste heat from the kilns is used to dry and heat green ware in the dryers.  
Air pollution control devices are used to reduce emissions from the manufacturing process.  
Fired, but unusable, brick are recycled back into the product, sold, or crushed and sized to produce brick chip products, including mulch, rip rap or road surfacing.

Please call if you have any questions.

Very truly yours,

GLEN-GERY CORPORATION
