RESTORATION OF CLAY MASONRY PROVIDED BY GLEN-GERY CORPORATION

While the instances are rare, clay masonry structures can find the need to have certain procedures performed to help keep them in top shape. Whether conditions include structural or aesthetic issues, we will provide you with the tools and information to help you and your owner make the best decisions to keep your building looking good and performing well for years to come.

Topics to be covered include -

Inspections

Discovering what happened can help us determine the proper course of action. We will look at some examples; see how the problem was exposed, and how the resulting course of action.

Basic Detailing and Installation

We will look at the current methods of building and designing walls and how they can be incorporated in repairs. Tuckpointing, sealants, and other techniques will be discussed.

Staining and Color Correction

There are many methods today to deal with staining and color differences. We will look at how they can be used to deal with these problems in a minimally invasive manner.

Scheduling and Sequencing

As with most types of construction, the sequence of installations is critical in most repairs. We will cover, in detail, the sequencing of a typical masonry restoration project.
