Big savings.

When smaller brick just doesn’t stack up.

The chart below lays out the differences in large brick and suggests the significant savings you can expect when you use it. On average, a mason who can complete 82 square feet of brickwork with modular units (3-5/8" x 2-1/4" x 7-5/8") in a day should be able to install 133 square feet in the same time with Glen-Gery Titan brick (3-5/8" x 3-5/8" x 15-5/8"). That’s 61 percent more square feet of brick in the wall and results in a shorter time on the job with substantially reduced labor costs. Remember, the larger the job, the greater the potential savings.

Big features.

Big benefits.

Larger brick means versatility and economy.

Builders and building owners in many major construction categories such as education, healthcare, retail, government and financial institutions—maximize their construction dollars by using large size brick from Glen-Gery. Buildings such as these suggest the practically limitless building and design possibilities that can be achieved with Glen-Gery’s larger size brick. Large brick sizes.

In addition, Glen-Gery’s large brick offers important advantages:

- Full aesthetic appeal of modular brick, with the same ability to match existing architectural context.
- Genuine, real clay non-fading brick products.
- The same durable color and physical wearing properties of any size brick.
- Availability in a wide range of colors and finishes.
- Multiple green building benefits that can contribute to LEED certification.

To reveal the specific demands of virtually any construction project, Glen-Gery offers large bricks in six sizes that deliver permanent construction performance and important project savings.

In addition, Glen-Gery’s large brick offers important advantages:

- Full aesthetic appeal of modular brick, with the same ability to match existing architectural context.
- Genuine, real clay non-fading brick products.
- The same durable color and physical wearing properties of any size brick.
- Availability in a wide range of colors and finishes.
- Multiple green building benefits that can contribute to LEED certification.

Big features.

Big benefits.

Larger brick means versatility and economy.

Builders and building owners in many major construction categories such as education, healthcare, retail, government and financial institutions—require that construction deliver by using large-size brick from Glen-Gery. Brick in our upsized Viking, Saxon, Titan, Titan Plus, Double Titan and Double Titan Plus products deliver all the lasting grace of smaller-size brick, while offering the utmost in design flexibility and budget control.

The big idea is simplicity itself—when larger brick sizes are selected, it takes less time and fewer bricks with less mortar to complete a structure. As such, labor costs for masonry with large brick can be substantially reduced. The cost of the bricks is actually less than that of the accessories—mortar, grout, rebar, flashing, caulk, insulation, sealants, cleaning compounds, wire and joint reinforcement.

In addition, Glen-Gery’s large brick offers important advantages:

- Full aesthetic appeal of modular brick, with the same ability to match existing architectural context.
- Genuine, real clay non-fading brick products.
- The same durable color and physical wearing properties of any size brick.
