

Timeless. Elegant. Durable.

Glen-Gery Hosts Masonry Association Event on Plant Site

{Wyomissing, PA – May 18, 2018} – Glen-Gery hosted the York and Adams Counties Masonry Association’s monthly meeting on the site of Glen-Gery’s Plant and Masonry Supply Center in York Pennsylvania on Wednesday, May 16.

More than two dozen attendees, consisting of YACMA (York Adams Counties Masonry Association) and Glen-Gery employees attended the event. The evening included plant tours, Glen-Gery Thin Tech® and StoneFit® installation demonstrations provided by Sabad La Serna, Glen-Gery’s Thin Systems Installation Manager, a dinner and raffle.

Thin Tech® is Glen-Gery’s patented mechanical support and spacing panel for thin brick, stone veneer and tile. The lightweight design reduces footing/lintel requirements, making it easier to apply thin masonry to interior walls, rehab exterior surfaces and apply a timeless masonry façade to new construction when building requirements may preclude the use of masonry products.

StoneFit® is Glen-Gery’s newest stone product using patented interlocking panels and an attachment bracket to secure the stone to the wall regardless of stud location. StoneFit coupled with DryFit Technology® form the industry’s first complete stone drainage wall system – the StoneFit Wall System®.

About Glen-Gery

With over 125 years of industry expertise, Glen-Gery is a share-leading manufacturer of brick and stone products and distributor of in-house manufactured and sourced exterior/interior building products to the residential and commercial channels in the U.S. and Canadian markets. With 10 manufacturing plants and 10 company owned distribution locations supporting builders, remodelers, contractors, architects, designers and end-users, Glen-Gery is a key operating company within Ibstock plc, UK.
