A wine cellar featuring thin brick walls and a vaulted ceiling. The walls are made of thin, irregularly shaped bricks with white mortar. The ceiling is also vaulted and features recessed lighting. A wooden wine rack is built into the wall on the left, filled with wine bottles. A bar counter is built into the wall on the right, with a framed picture of a street scene on the wall above it. A vase of flowers and a bottle of wine are on the counter. The floor is made of large, irregularly shaped tiles.

THIN
BRICK

Truly amazing product diversity

PRODUCT DIVERSITY

Glen-Gery Thin Brick is a compelling alternative developed to give architects, engineers, builders and homeowners a choice that expands their design potential by eliminating certain restrictions. Its ageless appeal can be a defining element when building plans or other factors may not permit the use of standard brick masonry. Now the beauty of brick's signal impression has a wider range of applications. Thin Brick will open up great possibilities to enhance internal or external walls and design elements.

Thin Brick provides the same uniformity and quality that is the standard for our full size facebrick.

The diversity of Glen-Gery Thin Brick is emblematic of the company's leadership in brick manufacturing and building innovation.

Glen-Gery offers Thin Brick in the widest variety of colors, textures and overall appearance for endless design possibilities.

Glen-Gery Thin Brick benefits:

Reduced fuel and energy use minimizes energy costs in manufacturing and transportation.

Reduced wall costs are possible because there are no shelf angles, lintels, support ledge, etc.

Increased sustainability means decreased use of raw materials and increased quarry life.

Provides an alternative to other materials and presents a genuine brick appearance.

Requires less structure, which means it will be a lighter load with less seismic concerns.

Less job site impact allows for a cleaner work environment with less materials.

Easier installation allows for a greater labor pool, with 15-20 percent fewer man-hours required to install comparable square footage.

Flagstaff Thin Brick

Nob Hill Thin Brick

A variety of applications

Extending brick's essential versatility, Thin Brick yields superior value at a manageable cost. It excels in a practically unlimited array of architectural settings. Designers who want the inimitable appeal of brick can achieve it even under sometimes constrained budgets for schools, offices, hospitals, apartments/condos, restaurants, malls, and the remodeling of homes with existing siding.

Commercial or residential, indoors or outdoors, for kitchens, basements, accent walls, fireplaces, ceilings and more, this product delivers the presence, permanence and sustainability of standard thicknesses. The choice need not be brick or something less. This is the compelling alternative that puts real brick within reach for countless applications.

Rustic Burgundy Thin Brick

RESIDENTIAL PROJECTS

Glen-Gery Thin Brick meet the requirements of a broad spectrum of projects—residential or commercial, interior or exterior. The choices and options are nearly endless, making it the pick of architects, engineers and homeowners who want greater design flexibility in a cost-effective product with brick's longstanding endurance.

INTERIOR PROJECTS

Rooms come to life when accented with the charm of brick. A variety of applications, ranging from fireplaces and backsplashes to interior walls and ceilings, can be done quickly and economically, all with the durability and richness of genuine Glen-Gery Thin Brick.

Residential or commercial facilities gain a warm visceral appeal from Thin Brick that reveals the enduring attraction of a brick façade.

Brandywine HMOS Thin Brick

Using the same Glen-Gery Thin Brick in separate areas of your home tie all of your designs together and create a sense of flow throughout your living spaces. This home used Glen-Gery Brandywine HMOS Thin Brick to bring the rich design of the first floor living room down to their finished basement and bar area.

Not all Thin Brick are recommended for use in interior paving applications. Please consult a masonry professional to ensure proper design/installation.

SPECIAL PROJECTS

Selecting the correct mortar is an important factor to achieve the desired results of your Thin Brick project. The standard concave technique is most popular for a clean finish and can be found on almost any project. Over-mortared joints are becoming increasingly popular to achieve that old world or rustic look.

The over-mortaring process

St. Thomas Over-mortared

Wheaton Over-mortared

Further customize your project by selecting a colored mortar. Glen-Gery has 21 color options for you to choose from.

Scotch Tradition HMOS Thin Brick

Not all Thin Brick are recommended for use in interior paving applications. Please consult a masonry professional to ensure proper design/installation.

INSTALLATION METHODS

Adhesive application

(interior only)

When Glen-Gery Thin Brick is used for interior walls, kitchens, fireplaces and distinctive design elements like backsplashes, installers can use adhesive applications with either masonry/concrete backing or wood/steel stud framing.

Adhesive interior installation on wood/steel stud framing.

Mortar application

Mortar can be used for both interior and exterior applications on masonry/concrete and also on wood/steel stud framing where moisture is not a concern.

Interior or exterior mortar application on masonry or concrete.

Glen-Gery Thin Tech®

Glen-Gery Thin Tech is a mechanical support and spacing panel for thin masonry veneers. The strongest, most durable thin veneer panel system ever designed. Each Thin Brick, tile or stone is supported by our patent pending support ties that mechanically interlock the masonry veneer to the panel.

Glen-Gery Thin Tech support tie patented configuration including the 76 degree angle ensures a mechanical connection without added installation requirements.

For additional information on Glen-Gery Thin Brick installation please visit our website at www.glen-gery.com

GLEN-GERY THIN TECH[®]

Thin Masonry Support Technology

Classic Series is your traditional choice with our patent pending locking support tie. Main features and benefits are:

Patent pending support tie configuration placed on a 76° angle

G-90 galvanized and thermal set coating

Stucco embossed texture

26-gauge architectural grade steel

Lightweight design

Elite Series is your choice for superior performance while maintaining all the features and benefits of the Classic Series, plus:

Superior drainage

Superior bond strength

Superior air flow and ventilation

Superior pressure equalization

Features rain screen technology
