Cushwa Brick: Built on Tradition

For more than 150 years, Cushwa Brick has been a trusted name in American masonry. Founded in Williamsport, Maryland in the late-1800s, Cushwa quickly earned a reputation for producing high-quality brick that helped shape the architectural character of cities and towns across the region.

From grand public buildings to enduring homes, Cushwa bricks became synonymous with strength, beauty, and reliability.

While technology has advanced and our manufacturing site has moved, our standards remain the same. We still retain the same color recipes, source premium clays and sands, fire with care, and honor the tradition of quality that made Cushwa a trusted name.

The high quality of the molded brick turned out by our molded factory are almost identical to those found on existing colonial structures.

We are proud to be the largest producer of specialty molded brick and brick shapes in the nation.

Rose Full Range

Every Cushwa brick by Glen-Gery carries forward more than 150 years of enduring excellence—built to last, just as they always have.

We provide a wide color range in a machine molded finish which is soft with very few nooks and crannies and a “1776” finish where we simulate the handmade look with slightly unfilled ends, nooks and crannies.

Over the years, we have refreshed and updated the names of our brick products to reflect modern needs and styles. Yet, we’ve been careful to preserve the historical names that carry our legacy as shown below. Looking for a product not listed? Contact us to see if we can make it to meet your specification!
